Al Mansurah , Egypt

---

Front-End Developer | React | Next.js | High-Performance Web Applications

Passionate Front-End Developer with strong expertise in React and Next.js, experienced in building interactive, high-quality web applications. Completed a comprehensive 80+ hour training course covering:

- Advanced state management for complex applications
- Component architecture for reusable and maintainable UI
- Performance optimization to ensure fast and responsive apps
- Full-stack application development using Supabase

Driven to create seamless and innovative user experiences, always applying best practices and the latest web technologies.

## Education

### **Very Good with Honors at Faculty of Computer Science and Information Systems – Mansoura University, IT Department**

June 2020 - January 2023

Graduation Project: Excellent

**at Self-Learning / Online Courses Completed Jonas Schmedtmann's course (React / Full-Stack Development) – 84 hours of in-depth learning.**

## Experience

### **Full-Stack Developer (MERN Stack) at General intelligence and reconnaissance, Army Service**

November 2023 - December 2024

### **Technical Support at Yarn shop, mansura**

January 2025 - Present

## Skills

**Frontend:** React, Next.js, JSX Redux, Redux Toolkit, Context API, React Query, useReducer Custom Hooks, useEffect Tailwind CSS, Styled Components, CSS Modules, Bootstrap

**Backend:** Node.js MongoDB, Mongoose Templating: EJS REST API Supabase, custom auth

**Version Control & Deployment:** Git, GitHub, Vercel, Netlify

**network:** ccna , mcsa core

**Office Tools:** Microsoft Office (Word, Excel, PowerPoint)

## Projects

### **Leon Project – HTML, CSS • ↗**

Implemented a landing page with interactive features, including navigation menus, responsive layouts, and dynamic elements.

### **Kasper Project – HTML, CSS • ↗**

Implemented a landing page with overlay effects, background slider, and navigation toggle for mobile devices.

## **Elzero Project – HTML, CSS** • ↗

This is a modern, multipurpose personal website designed to showcase a portfolio, articles, gallery, team, services, skills, and events. It features:

### **Dashboard Project – HTML, CSS** • ↗

layout for project management, including interactive charts, task summaries, progress tracking, and a user-friendly interface suitable for monitoring projects, team activities, and key metrics at a glance.

### **Image Search Engine Using HTML CSS and JavaScript** • ↗

make an image search engine where we can search for any image by typing name and it will display list of images from stock images website unsplash. Here we are using Unsplash API to make this image search engine with the help of JavaScript.

### **social media website design ( Facebook )** • ↗

make a social media website design like Facebook ,create this drop-down menu, light mode and dark mode switching option using JavaScript.

### **Product Page** • ↗

product page design that can be used on ecommerce website. On this product page design we will display the product image gallery and product description. We will also add option to choose the product variation before buying.

### **Pizza Menu — Components & Props** • ↗

A dynamic pizza menu built with React, showcasing reusable components and prop-driven customization. Users can explore different pizzas with detailed descriptions and images, demonstrating mastery of component composition and data passing.

### **Travel List — State Management** • ↗

An interactive travel checklist app that allows users to add, edit, and remove destinations. Focuses on effective state management techniques in React to handle dynamic lists and user interactions seamlessly.

### **Eat-n-Split — Interactive UI** • ↗

A restaurant bill-splitting application with a responsive, user-friendly interface. Highlights handling user inputs, live calculations, and interactive UI updates to enhance the user experience.

### **usePopcorn — Data Fetching & Custom Hooks** • ↗

A movie discovery app that fetches data from external APIs using custom React hooks. Demonstrates the creation of reusable hooks, efficient data fetching, and state management for asynchronous operations.

### **Quiz App — Reducer Logic** • ↗

An engaging quiz platform where users can take quizzes and track scores. Implements complex state transitions using the useReducer hook, showcasing advanced state management strategies.

### **WorldWise — Router, Context, Memoization** • ↗

A travel and information platform using React Router for navigation, Context API for global state, and memoization techniques for performance optimization. Users can explore countries and view detailed data efficiently.

### **Fast React Pizza — Redux, Routing, Tailwind** • ↗

A full-featured pizza ordering application leveraging Redux for global state management, React Router for navigation, and Tailwind CSS for styling. Demonstrates scalable architecture and modern React best practices.

### **The Wild Oasis (Admin) — Full-Stack Dashboard** • ↗

An admin dashboard for managing resort data, bookings, and user activities. Built with a full-stack approach, integrating backend APIs, authentication, and dynamic data visualization for administrative tasks.

## **The Wild Oasis Website — Next.js Server Components & Actions**

A production-ready website for The Wild Oasis resort, utilizing Next.js server components and actions for optimized performance. Focuses on server-side rendering, SEO optimization, and a smooth, modern user experience.

## **Yarn Shop Management System • ↗**

Node.js | Express | MongoDB | EJS | Bootstrap Developed a full-stack Yarn Shop web application with a user-friendly interface using EJS and Bootstrap. Created dynamic invoice generation with real-time price calculations and item management. Built full CRUD functionality for products, customers, and invoices.
